

**G21 ANTI-SEIZE LUBRICANT FOR STAINLESS STEEL FASTENERS****Description**

Product especially suitable for the prevention of galling during the tightening of fasteners. It is versatile and environmentally friendly. It consists of a water-based colloidal suspension of solid lubricants.

It forms a dry to the touch film, non-sticking and resistant to abrasion.

**General properties**

- It provides a very low coefficient of friction.
- Colourless appearance
- It avoids galling in surfaces under load and motion.
- Facilitates sliding.
- It provides a smooth tightening of the fasteners due to its low coefficient of friction.

**Application technology****Dip-spinning****Uses**

Lubrication of stainless steel parts such as rivets, thread cutting screws, thread rolling screws and other parts that need high speed in the assembly.

THIS TREATMENT IS APPLIED DIRECTLY IN LINE OR IN COMBINATION WITH PREVIOUS AND SUBSEQUENT APPLICATIONS.

GALOL S.A. offers the possibility to reduce logistic costs between the different operations of manufacturing of the part.
